

AudioBox Go (Dealer Copy)

Fender AudioBox Go

2 x 2, 24-bit / 96 kHz USB-C Audio Interface

Short Description:

The Fender AudioBox Go is an ultra-compact, bus-powered USB-C interface delivering professional 24-bit/96 kHz audio. Featuring a studio-grade microphone preamp, a dedicated instrument input, low-latency monitoring, and a free 6-month trial of Fender Studio Pro, AudioBox Go is perfect for home studios, mobile setups, and aspiring musicians or podcasters on the go.

Featured Bullets:

- **Ultra-Compact 2 x 2 USB-C Interface** – Portable, bus-powered design for recording anywhere.
- **XLR Mic/Line Combo Input with Phantom Power** – Switchable +48V for condenser mics and versatile recording.
- **Dedicated TS Instrument Input** – Optimized for guitar or bass.
- **¼-Inch Stereo Headphone Output** – Provides clear, detailed monitoring for recording, mixing, and playback.
- **Two Balanced ¼-Inch TRS Main Outputs** – Connect studio monitors or powered speakers.
- **Studio-Grade 24-bit / 96 kHz Converters** – Capture vocals, instruments, and line sources with clarity and detail.
- **DAW Compatibility** – Works seamlessly with Fender Studio, Fender Studio Pro, and most other audio apps.
- **Includes 6 Months of Fender Studio Pro** – Create, mix, master, and perform with the award-winning DAW.

Full Description:

The **Fender AudioBox Go** is a portable, high-performance 2 x 2 USB-C audio interface designed for creators who need professional-quality recording anywhere. Its **XLR mic/line combo input** with switchable +48V phantom power handles vocal and instrument recording with clarity, while the **dedicated TS instrument input** delivers plug-and-play tone for guitars, basses, and line-level sources.

Professional **24-bit / 96 kHz converters** and low-noise preamps ensure every recording is crisp and detailed. The **¼-inch stereo headphone output** and **balanced TRS main outputs** give you flexible monitoring options, while the **Mix control** lets you dial in low-latency, real-time tracking for precise performance.

AudioBox Go is bus-powered, ultra-portable, and integrates easily into home studios, desktop rigs, and mobile setups. It's compatible with Fender Studio, Fender Studio Pro, and most other audio apps — and **includes a free 6-month trial of Fender Studio Pro** so you can start creating, mixing, and producing right out of the box.
